Federal Leasing Program

Our Federal Lease Program provides your Federal clients with flexible and convenient payment terms for your products. Today, **about one-third (over $100 billion dollars!)** of all capital equipment is acquired on a leased basis, and with over 10 years of providing Federal financing services, our Federal Leasing Program is ready to provide your client with a competitive term and payment structure, as well as the customer service you've come to expect from Leasing Innovations, Incorporated.

Utilize Leasing to help sell your products to

Federal Government Agencies

Leasing is Flexible. Leasing can be tailored to meet the needs within your federal client's budget. With flexible buyout options, variable payment levels, and no down payment required, leasing terms are maximized to compliment your Federal client's budgetary requirements.

Leasing Helps Budget Management and Conserves Surplus. Leasing meets annual appropriation needs of most Federal budgets. Surplus is conserved because a smaller portion of your client's budget is required for the equipment they need.

Leasing Rates Are Competitive. With over 10 years of Federal leasing experience, we can provide your client with the lowest possible rates. This assures your Federal client of a competitive, cost effective means of financing.

Leasing is Convenient. With flexible payment schedules availability of Electronic Fund Transfers (EFT), leasing is the most convenient form of financing available. Simple paperwork and documentation make leasing the fastest growing equipment financing tool today.

Leasing with a Purchase Order. Leasing payments are merely added language to a purchase order. From there, we will do the rest. No administrative headaches!

Leasing Provides for Technology Upgrades. A lease may be structured to provide for future upgrades in equipment. This can protect you from technology obsolescence, as well as meeting the needs of future operational changes.
